SUMMARY

Computer Science undergraduate specializing in Cloud Computing with strong foundations in Python, Java, C++, Data Structures and Algorithms, Object-Oriented Programming, SQL, and AWS. Experienced in developing software applications, data-driven systems, and cloud-based solutions. Passionate about problem solving, scalable system development, and writing efficient and maintainable code.

EDUCATION

SRM University of Science and Technology — Aug. 2023 – May 2027
B.Tech in Computer Science - Cloud Computing — CGPA: 9.65

Narayana Junior College — 2021 – 2023
Class XII — 80.6%

Narayana E-Techno School — 2021
Class X — 94.6%

PROJECTS

IntelliAC

- **Tech: Java**
- Developed a Java-based AC power management system to automate classroom AC monitoring and control based on usage conditions.
- Implemented object-oriented modules for power monitoring and automated control to optimize AC operation.
- Designed control logic to reduce unnecessary energy consumption while maintaining comfortable classroom conditions.
- Improved energy efficiency and reduced operational costs through automated monitoring and power management.

Smart Food Flow

- **Tech: Python, Hadoop, Apache Spark, SQL, XGBoost**
- Developed a predictive inventory management system using Python, SQL, Hadoop, Apache Spark, and XGBoost.
- Built scalable data-processing pipelines using Hadoop and Spark for demand forecasting and inventory optimization.
- Implemented feature engineering and machine learning techniques to achieve 99% prediction accuracy.
- Reduced food waste by 45% through demand forecasting and optimized inventory management.

Adaptive Digital Mental Risk Index (ADMRI)

- **Tech: Python, TensorFlow.js, Machine Learning**
- Developed a browser-based AI risk assessment system using Python, TensorFlow.js, and machine learning.
- Implemented data processing and prediction workflows for questionnaire-based risk classification.
- Designed client-side processing using TensorFlow.js for efficient model execution within the browser.

TECHNICAL SKILLS

Programming: Python, Java, C++, SQL
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, SDLC
Cloud: AWS, EC2, S3, IAM, RDS, Lambda, API Gateway
Development: HTML, CSS, JavaScript, Git, GitHub
Data & ML: Hadoop, Apache Spark, XGBoost, TensorFlow, Pandas, NumPy
Concepts: Problem Solving, Database Design, Agile (Scrum)

EXPERIENCE

Cloud Virtual Internship [Link] Jan 2025 – Mar 2025
Intern

- Gained hands-on experience with cloud computing, virtualization, deployment strategies, and infrastructure management.
- Worked with cloud-based deployment concepts and infrastructure management practices.

Google Android Developer Virtual Internship [Link] Jul 2025 – Sep 2025
Intern

- Completed a 3-month AICTE virtual internship focused on Android application development.
- Worked with core Android concepts, UI design, application lifecycle management, and mobile application development.

CERTIFICATIONS

AWS Certified Solutions Architect - Associate [Link] April 2026
AWS Certified Cloud Practitioner [Link] April 2026
SAP Generative AI Developer – SAP [Link] Mar 2026 – Mar 2027
NSS Space Settlement [Link] Mar 2021

RESEARCH PAPER PUBLISHED

ICSES 2026 – IEEE Jan 2026
Intelligent Food Inventory Management System [Link]
